

The American College of Chest Physicians - Philippine Delegation (CHEST-PD) converges in Cebu to hold its 26th Annual Scientific Meeting (ASM) entitled Controversies, Essentials, Basics and Updates (CEBU): New Frontiers in Lung Health on April 23-25, 2020. With pride, I enjoin you to come to Cebu to listen to local and international experts, led by CHEST's president-elect and Keynote Speaker Dr. Stephanie Levine, to talk on a wide range of pulmonary conditions in the community, workplace, bedside and critical care setting. The scientific program and wet clinics specially prepared for both specialists and non-specialists will hopefully provide us with new insights on how to manage common lung diseases, learn how to apply evidence when faced with clinical controversies, and sharpen our practical skills to relearn techniques useful at point of care, for better patient outcomes. Cebu is calling us. Come and learn from one another. Come and serve in the special educational pulmonary medical mission. Come and unwind in the paradise of Cebu. Maayo!
